AttestLayer · Deterministic PASS/FAIL Evidence Kits (Record-Only)

FAST TRACK APPROVAL SHEET

Executive Summary

AttestLayer converts BYO artifacts into a deterministic, signed evidence package ("kit.zip") that your customer can verify offline.

- **Deterministic PASS/FAIL**
- PASS produces kit.zip + manifest + signed receipt + verifier bundle
- FAIL produces a machine-readable blocker checklist
- FAIL consumes $0 credits (fail-closed billing)

Operational Model

- Record-only processing (no installs, no integrations, no system access)
- We do NOT answer security questionnaires
- We do NOT provide legal or compliance opinions
- We do NOT invent evidence or fill gaps

Billing Model

Option A · Activation Lane (one-time)

- Activation purchases are prepaid and non-cash-refundable
- Activation-10 may step up to Activation-25 within 14 days with 100% of the Activation-10 purchase price applied to the Activation-25 purchase price
- Original Activation-10 credits do not stack separately after upgrade; the purchase-price credit replaces the unused Activation-10 balance
- If MMC is executed within 90 days, eligible unused paid Activation balance converts 1:1 into MMC credits at execution
- Credits burn only on PASS + Verify PASS

Option B · Reserved Capacity (MMC) (month-to-month)

- MMC auto-renews monthly
- Cancellation requires 30-day written notice
- SLA starts after PASS (not upload)
- Make-good (tiers with make-good): automatic credit back + 10% bonus credit if SLA missed after PASS

Company

- **Operating name:** AttestLayer
- **HQ:** Montréal, Québec, Canada
- **Founder:** Rabie Macbahi
- **Contacts:**

- Partners: partners@attestlayer.com
- Billing: billing@attestlayer.com
- Security: security@attestlayer.com

RISK & CONTROLS (CLAIMS WE CAN PROVE)

Cryptographic Controls

- **Hashing:** SHA-256 per file + manifest root hash
- **Signing:** Ed25519 receipts with published key history (kid)
- **Verification:** browser/offline verification supported (no server trust required)

Infrastructure & Data Handling

- **Cloud:** Google Cloud Platform (northamerica-northeast1 / Montréal)
- **Payments:** handled by Stripe (we do not store full card numbers)
- **Upload retention:** up to 24 hours (auto deletion)
- **Hosted deliverable links:** 30 days (expiring links + auto deletion)

Important Disclosures

- Not legal advice. Not an audit opinion. Not a compliance certification.
- Early-stage operational metrics (Ops Proof) are not audited and are provided for transparency, not guarantees.
